DETAILED ACTION

Election/Restrictions

1. Claim 17 is withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected invention, there being no allowable generic or linking claim. Election was made without traverse in the reply filed on 3/24/05.

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1, 3, 4 are rejected under 35 U.S.C. 102(b) as being anticipated by Cook et al ('902). The reference discloses a fuel emission control system having a diagnostic system, which uses a positive pressure test method having an air pump. The system determines leakage according to sensed pressure compared to predetermined criterion in a conventional manner.

Art Unit: 3747

3. Claim 9 and 11-12 are rejected under 35 U.S.C. 102(b) as being anticipated by Cook et al. ('645). The reference discloses a fuel emission control system having a diagnostic system that uses a positive pressure test method having an air pump. The system determines leakage according to leakage through a known orifice compared to predetermined criterion versus time.

Allowable Subject Matter

4. Claims 2, 5-8, 10, 13-16 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. See the prior art showing fuel vapor systems having diagnostic systems which use air pumps to pressurize the system for testing. Note the use of fuel level adjustments in the various systems.
